Associate Professor
Physics Department, Universidad de Los Andes (Colombia)

ACADEMIC EXPERIENCE & EDUCATION

10/2023 – To date	Associate Professor at the Physics Department, Universidad de Los Andes, Bogotá, Colombia. Principal Investigator of the Quantum Materials Lab at this institution.
01/2019 – 09/2023	Assistant Professor at the Physics Department, Universidad de Los Andes, Bogotá, Colombia. Principal Investigator of the Quantum Materials Lab.
10/2017 – 12/2018	Visiting Professor at the Physics Department, Universidad de Los Andes, Bogotá, Colombia. Teaching and research activities.
07/2015 – 06/2017	Jack E. Crow Postdoctoral Fellow - National High Magnetic Field Laboratory. Projects: *Resonant Ultrasound Spectroscopy in highly correlated materials*; and *Magnetotransport of quantum materials in the ultrahigh field limit.*
09/2009–06/2015	Physics Ph.D - Stanford University. Thesis title: *Phase separation in $BaPb_{1-x}Bi_xO_3$ and Fermiology of hole-doped PbTe: Insights to understand superconductivity in valence-disproportionated systems.*
08/2007–07/2009	Master of Science - Physics, at Universidad de Los Andes, Colombia. Thesis title: *Study of vortex dynamics by means of noise measurement in unconventional superconductors*
01/2002–05/2006	Bachelor in Physics - Universidad de Los Andes, Colombia. Thesis title: *Molecular condensates and their statistical properties (Theory and simulation)*

RESEARCH PROFILE

I lead the Quantum Materials group at Universidad de Los Andes. In our group we are interested in the study of complex and strongly correlated materials for which the competition of different energy scales results in the establishment of novel ground states. We are interested in characterizing and understanding the origin and nature of such ground states, as well as the way of controlling and optimizing their properties by tuning a variety of physical parameters such as temperature, magnetic field, chemical doping, pressure or strain. Some of the phenomena we commonly encounter in the materials we study, that are associated with such novel ground states, are superconductivity, charge density wave disproportionation, valence disproportionation, phase separation (electronic and/or structural), thermoelectricity, ferroic orders, and topological states. We accompany our research program with a material synthesis effort, mainly in the form of single crystals of the highest possible quality, which also gives us the opportunity to chemically manipulate our compounds to optimize their promissing properties.

FELLOWSHIPS AND AWARDS

[1] Friends of the Academy (Amigos de la Academia) Award to the Young Colombian Scientist, by the Colombian Academy of Exact, Physical and Natural Sciences. Bogotá, Colombia. August of 2021. Announcement here.

[2] L'oreal-UNESCO For Women In Science- International Rising Talents Award. Paris, France. March of 2020. Announcement here.

[3] Lee-Osheroff-Richardson science award for the Americas, sponsored by Oxford Instruments. USA, March of 2019. Announcement here.

[4] L'oreal-UNESCO For Women In Science Award, Colombia. December of 2018.

[5] Jack E. Crow Postdoctoral Fellowship, National High Magnetic Field Laboratory (NHMFL), Tallahassee, FL, USA. July of 2015.

[6] GCOE - BIEP (Global Center of Excellence - Bilateral International Exchange Program), Kyoto University, Japan. May of 2009.

INVITED TALKS

Here are some selected invited talks:

[1] **Mathematical Aspects of Topological Insulators, IMSA, U. of Miami, USA**. April of 2024. Title: *Revealing the electronic structure and topological states of charge density wave compounds.*

[2] **2D Transition Metal Dichalcogenides Conference, Cambridge, UK**. June of 2023. Title: *Room Teperature Multiferroicity in Transition Metal Dichalcogenides.*

[3] **Workshop: Quantum materials and devices at the nanoscale, 2022**. Organized by the European COST Action "Nanoscale coherent hybrid devices for superconducting quantum technologie". Title: *Charge Density Wave Formation In The Quasi-1D Transition Metal Tetrachalcogenides.*

[4] **Harvey Mudd College, USA, Physics Colloquium**. April of 2022. Title: *High Magnetic Fields: a "magnifying glass" to spy on what electrons do!.*

[5] **Women's perspectives in Quantum Materials Webinar, 2021**. Organized by the Journal of Physics: Materials. Title: *Revealing and optimizing the electronic properties of quantum materials.*

[6] **2021 ICFO-UNAM International School on the Frontiers of light – Quantum Challenges**. Title: *Quantum materials in extreme conditions.*

[7] **2021 American Physical Society - APS March Meeting**. Online event. March of 2021. Invited symposium session: "Strange Metal Transport in Cuprates and Fe-based Superconductors". Title: *Scale Invariant Magnetoresistance in a Cuprate Superconductor.*

[8] **California State University - Long Beach, Physics Colloquium**. February of 2021. Title: *High Magnetic Fields: a "magnifying glass" to spy on what electrons do!.*

[9] **Webinar: Quantum materials and light-matter interactions: Kickoff meeting**. Online event, Organized by the "Light-matter interactions in topological nanomaterials: Towards low-consumption information technologies" program, Chile. November of 2020. Title: *Probing Broken Symmetries of Quantum Materials by Resonant Ultrasound Spectroscopy.*

[10] **Convergence Research at High Magnetic Fields Symposium**. Tallahassee, FL, USA. To be given in January of 2020. Title: *Probing Broken Symmetries of Quantum Materials by Resonant Ultrasound Spectroscopy.*

[11] **2019 Materials Research Society (MRS) Fall Meeting**. Boston, MA, USA. To be given in December of 2019. Title: *Probing Broken Symmetries of Quantum Materials by Resonant Ultrasound Spectroscopy.* Invited talk to the special symposium: Predictive Synthesis and Advanced Characterization of Emerging Quantum Materials.

[12] **International Congress of Materials, CIM2019**. Bucaramanga, Colombia. October of 2019. Title: *Quantum materials in extreme conditions.* Plenary session.

[13] **XIX Young researchers meeting, Instituto Nicolás Cabrera, Universidad Autónoma de Madrid**. Madrid, Spain. December of 2016. Title: *Insights to understand superconductivity in valence disproportionated systems.*

[14] **Condensed Matter Seminar, University of Texas - Austin**. Austin, TX, USA. May of 2016. Title: *Fermiology of hole-doped PbTe: Insights to understand superconductivity in a valence disproportionated compound.*

[15] **Quantum Materials Colloquium, Kyoto University**. Kyoto, Japan. May of 2009. Title: *Vortex noise in high-temperature superconductors.*

AWARDED GRANTS/PROJECTS

[1] **Banco de la República, Colombia, FPIT call**. Principal Investigator. Start date: March of 2024. Project: *Study of elastic properties of transition metal tetrachalcogenides through RUS.*

[2] **MinCiencias, Colombia, 028-2022 call**. Start date: Febuary of 2024. Project: *Ampliación del uso de la mecánica cuántica desde el punto de vista experimental y su relación con la teoría, generando desarrollos en tecnologías cuánticas útiles para metrología y computación cuántica a nivel nacional.* In collaboration with professors Hervert Vinck (PI) and William Herrera and team in U. Nacional, and a wide team of researchers from other Universities in Colombia.

[3] **Banco de la República, Colombia, FPIT call**. Principal Investigator. Start date: August of 2022. Project: *Optimization of piezoelectric properties in transition metal dichalcogenides via chemical doping.*

[4] **CSIC, Spain. i-COOP+ 2020**. Principal Foreign Investigator. Start date: January of 2021. Project: *Optoelectronic devices based on doped transition metal chalcogenides.* In collaboration with Dr. Andrés Castellanos-Gómez (local CSIC researcher).

[5] **MinCiencias, Colombia, 852-2019 call**. Start date: November of 2020. Project: *Thermoelectricity in low-dimensional materials: relationship between electronic and thermoelectric properties at the nanoscale.* In collaboration with professor Jose A. Galvis (PI) and team in U. Central, and professor Camilo Espejo in Uninorte.

[6] **L'oreal-UNESCO "For Women in Science", "International Rising Talents" 2020**. Principal Investigator. Start date: March of 2020. Project: *Optimization of electronic properties of quasi-1D transition metal chalcogenide materials.*

[7] **High Magnetic Field Laboratory, USA - Magnet time assignment**. Principal Investigator. Start date: January of 2020. Project: *High field study of quasi-1D transition metal chalcogenides and related charge-ordered compounds.* In collaboration with professor José A. Galvis, U. Central; Dr. Edwin Herrera and professors Isabel Guillamón and Hermann Suderow, U. Autónoma de Madrid; and professor Ian R. Fisher, Stanford University.

[8] **MinCiencias, Colombia, 808-2018 call**. Start date: June of 2019. Project: *Production and characterization of new low-dimensional quantum materials: quantum criticality and electronic phase transitions.* In collaboration with Dr. Juan José Mendoza, and professors Ferney Rodríguez and Luis Quiroga, in Uniandes; professor José A. Galvis, U. Central; and professor Doris Cadavid, UNAL.

[9] **American Physical Society International Research Travel Award Program 2019, USA**. Principal Investigator. Executed in July of 2019. Project: *Charge Density Wave Quantum Criticality in Transition Metal Dichalcogenides.* In collaboration with professor Ian R. Fisher, Stanford University.

[10] **L'oreal-UNESCO "For Women in Science", Colombia, 2018**. Principal Investigator. Dates: December of 2018 to December of 2019. Project: *Production and characterization of high-quality quantum materials.*

THESIS ADVISING

Graduate thesis:

[1] Ph.D. in physics thesis adviser of Universidad de Los Andes student, Harold Rojas Páez. Thesis title: *"Multiferroicity in alloys of 2D Transition-Metal Dichalcogenides".* Currently being developed, since August 2022.

[2] Ph.D. in physics thesis adviser of Universidad de Los Andes student, Diego Silvera Vega. Thesis title: *"Charge Density Wave phases and topological states in quasi-1D Transition Metal Tetrachalcogenides".* Currently being developed, since January 2022.

[3] Master thesis adviser of Master in Physics student of Universidad de Los Andes, Juan Pablo Cruz Castiblanco. Thesis title: *"Resonance ultrasound spectroscopy in transition metal tetrachalcogenides".* Graduated in April of 2024.

[4] Master thesis adviser of Master in Physics student of Universidad de Los Andes, Julian Rojas Castillo. Thesis title: *"Electronic and topological properties of $TaTe_4$ and Cu-doped $TaTe_4$".* Graduated in April of 2024.

[5] Master thesis adviser of Master in Physics student of Universidad de Los Andes, Cristian Borja Peña. Thesis title: *"Superconductivity and Charge Density Wave in the Extended Fermi-Hubbard Model with Disorder".* Graduated in December of 2022.

[6] Master thesis adviser of Master in Physics student of Universidad de Los Andes, Karen Vega Bustos. Thesis title: *"Variation of electronic properties of the transition metal dichalcogenide WSe_2 through chemical doping".* Thesis finished in August of 2022.

[7] Master thesis adviser of Master in Physics student of Universidad de Los Andes, Jose Danilo Salcedo. Thesis title: *"Charge density wave and superconductivity in $Ta_{1-x}Mo_xS_2$: Evolution of structural and electronic properties".* Graduated in June of 2021.

[8] Master thesis co-adviser of Master in Physics student of Universidad de Los Andes, Juan Sebastian Calderón García. Thesis title: *"Theoretical and experimental study of topological invariants in crystalline topological insulators"*. Graduated in March of 2019.

Undergraduate thesis:

[1] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Luciano Bastidas. Thesis title: *"Study of piezoelectric materials through resonant untrasound spectroscopy"*. Finished in June of 2023.

[2] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Julian Rojas Castillo. Thesis title: *"Electronic properties of Weyl-semimetal candidate TaTe4"*. Graduated in December of 2021.

[3] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Juan Felipe Rodríguez. Thesis title: *"Measurements of the mechanical resonance spectrum of quantum materials through RUS"*. Graduated in December of 2021.

[4] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Felipe Giraldo. Thesis title: *"Numerical techniques applied to resonant ultrasound spectroscopy analysis"*. Graduated in June of 2021.

[5] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Santiago Valencia. Thesis title: *"Electronic properties of transition metal dichalcogenides and their modification through chemical doping"*. Graduated in June of 2020.

[6] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Diana Jimenez. Thesis title: *"Search for Superconductivity in quasi-1D transition metal chalcogenides through chemical doping"*. Graduated in June of 2020.

[7] Undergraduate thesis adviser of Physics student of Universidad de Los Andes, Yvan Hernandez Thesis title: *"Implementation of a Resonant ultrasound spectroscopy experimental setup in Universidad de Los Andes"*. Graduated in June of 2020.

[8] Undergraduate thesis adviser of the physics student of Universidad Distrital Francisco José de Caldas, Luis Eduardo Rivera Guerrero. Thesis title: *"AC susceptibility and third harmonic detection for studying superconductors and magnetic materials"*. Graduated in April of 2019.

[9] Undergraduate thesis adviser of the physics student of Universidad Distrital Francisco José de Caldas, Miguel Angel Roncancio Herrera. Thesis title: *"Electrochemical single crystal growth of superconducting $Ba_{1-x}K_xBiO_3$"*. Graduated in December of 2018.

GRADUATE THESIS EVALUATION

[1] Evaluator in doctoral thesis dissertation. Universidad de Los Andes, Physics Department. Bogotá, Colombia. January of 2024. Thesis evaluated: *"Light-Matter Interactions and Inhomogeneities in Correlated Systems: Topological, Superconducting, and Magnetic Properties". Student: Fabio Pablo Miguel Méndez-Córdoba.*

[2] Evaluator in master thesis dissertation. Universidad Nacional de Colombia, Physics Department. Bogotá, Colombia. November of 2023. Thesis evaluated: *"Exploring Dirac Materials and Two-Dimensional Magnet Using Green's Function Method and Quantum Magnetic Imaging". Student: Jeyson de Jesús Támara Isaza.*

[3] Evaluator in master thesis dissertation. Universidad Nacional de Colombia, Physics Department. Bogotá, Colombia. May of 2023. Thesis evaluated: *"Fabrication and characterization of intermetallic systems of the family RT_2Al_10 based on rare earths, thorugh the flux technique". Student: Juan Camilo Delgado Saavedra.*

[4] Evaluator in doctoral thesis proposal. Universidad Industrial de Santander, Physics Department. Bucaramanga, Colombia. June of 2020. Thesis evaluated: *"Chirality-induced multifunctional properties in crystalline materials". Student: Daniel David Torres Amaris.*
